

# Adding Library Resources to Your Blackboard Course

Students can search for Library resources and ask for research help without leaving your Blackboard course

## Add Library resources to your online course in just a few, simple steps!

1. Go to your **Blackboard** course → Select **Content** from the navigation bar on the left
2. Select **Build Content** → **Create File**
3. Name the File, select **Browse Content Collection** and hover over the **Browse Folder** icon to display locations
4. Select **Institutional Content** → Open the **Auraria Library** folder
5. Click the radio button next to the **libraryresources.html** file and click **Submit**

Your file is now in the **Content** area of the course. Make the file **available** to students and click **Submit**

## Display the file link in the menu bar:

1. Go to the **+** sign at the top of the navigation bar on the left and select **Course Link**
2. Browse the **Course Folders**, select the file you just added, and make it available to users
